7/, 8/, 12/.

MUSGRAVE'S PATENT SLOW-COMBUSTION STOVES.

NEW REGISTERED ORNAMENTAL DESIGNS.

Design 17, No. O Size.

Design 19, No. 1 Size.

These designs are precisely the same in construction and heating power as the Rough Slow-Combustion Stoves. Designs 13 and 12N, with the addition of an external casing of Ornamental Ironwork, finished in a suitable manner for being placed in Hospital Wards, Schools, Halls, Offices, Public Buildings, &c.

They can be made with the flue nozzle either out of the back or out of the top, to suit ascending flues.

Orders should state in what position the Stove is to be fixed. If not stated, the Stoves will be sent with flue nozzle at back.

Selections from Letters expressing the opinion of those who have Musgrave's Patent Stoves in use:

From the School Board of the Borough of Stockton-on-Tees,
7th May, 1883.

Gentlemen,—Since the fixing of your Stoves they have fully proved their good qualities. In economy of fuel, warmth, cleanliness, and appearance, they have given great satisfaction.

From H. Wood, Esq., Christ Church Schools, Mount Sorrel,
Loughborough, 23rd July, 1885.

I used three of your Slow-Combustion Stoves in my Schools in Lincolnshire. My present managers have introduced another Stove in my present rooms, but they are not to be mentioned in the same breath with yours. I am about to introduce one of yours into my own house, and shall feel obliged if you will kindly send me your illustrated catalogue.

From W. Lee, Esq., Secretary Leeds School Board, 14th Feb., 1881.

Dear Sirs,—I have pleasure in stating that the Stoves have been fixed to the entire satisfaction of the Board, and are in good working order.

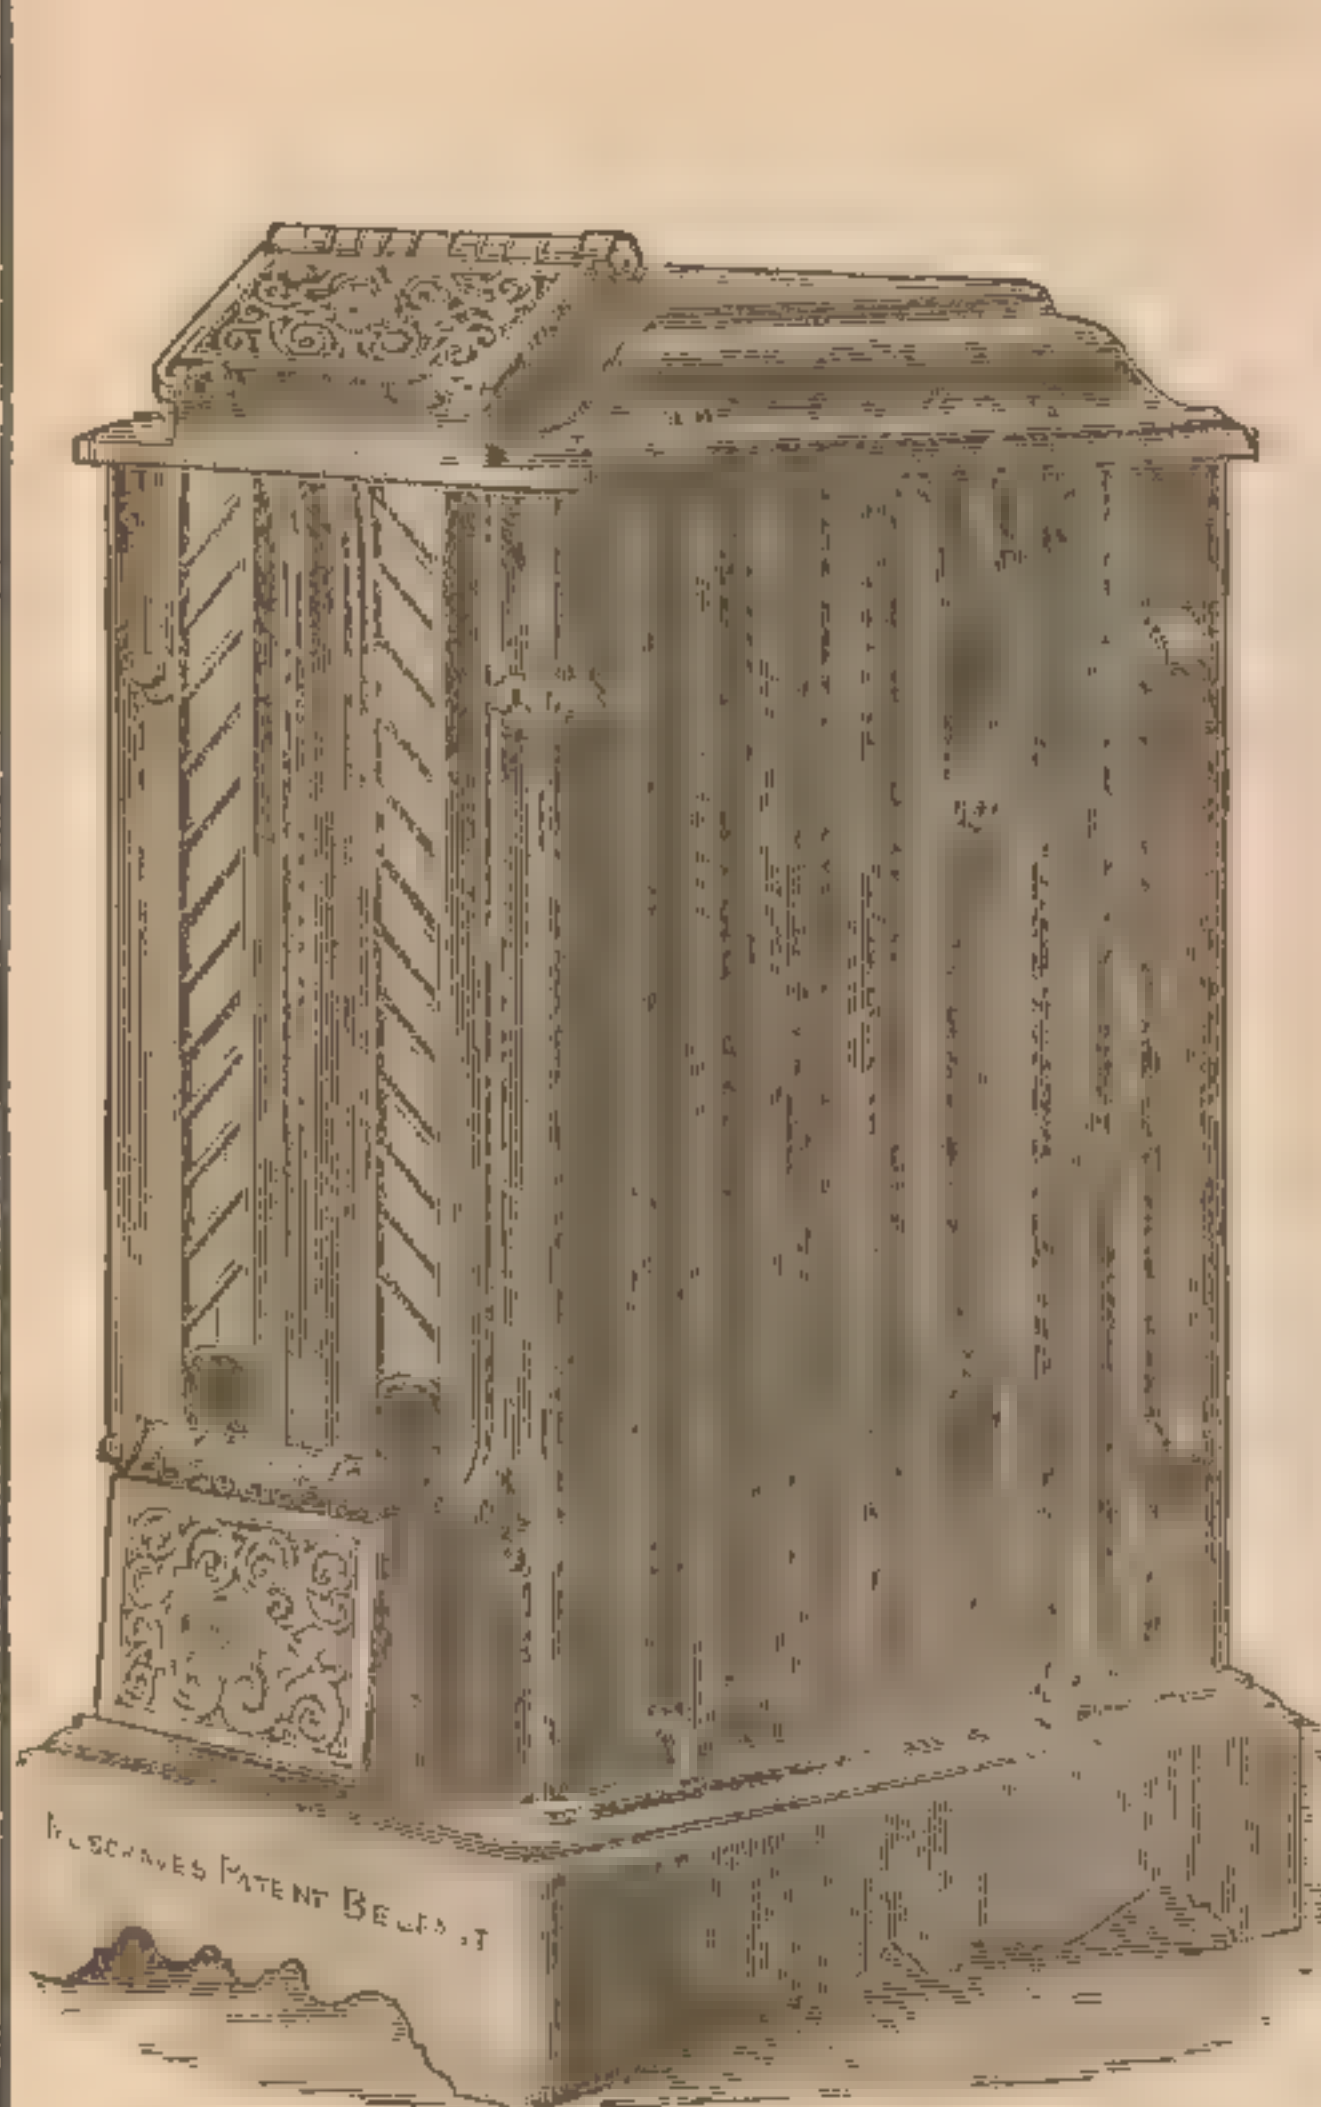

The teachers of the Schools are also highly pleased with them. (The above refers to 40 Stoves supplied during the winter of 1880-81, and since then over 80 additional Stoves have been supplied to this School Board.)

From W. Collingwood, M.B., Medical Officer of Health,
Deptford, August 8th, 1880.

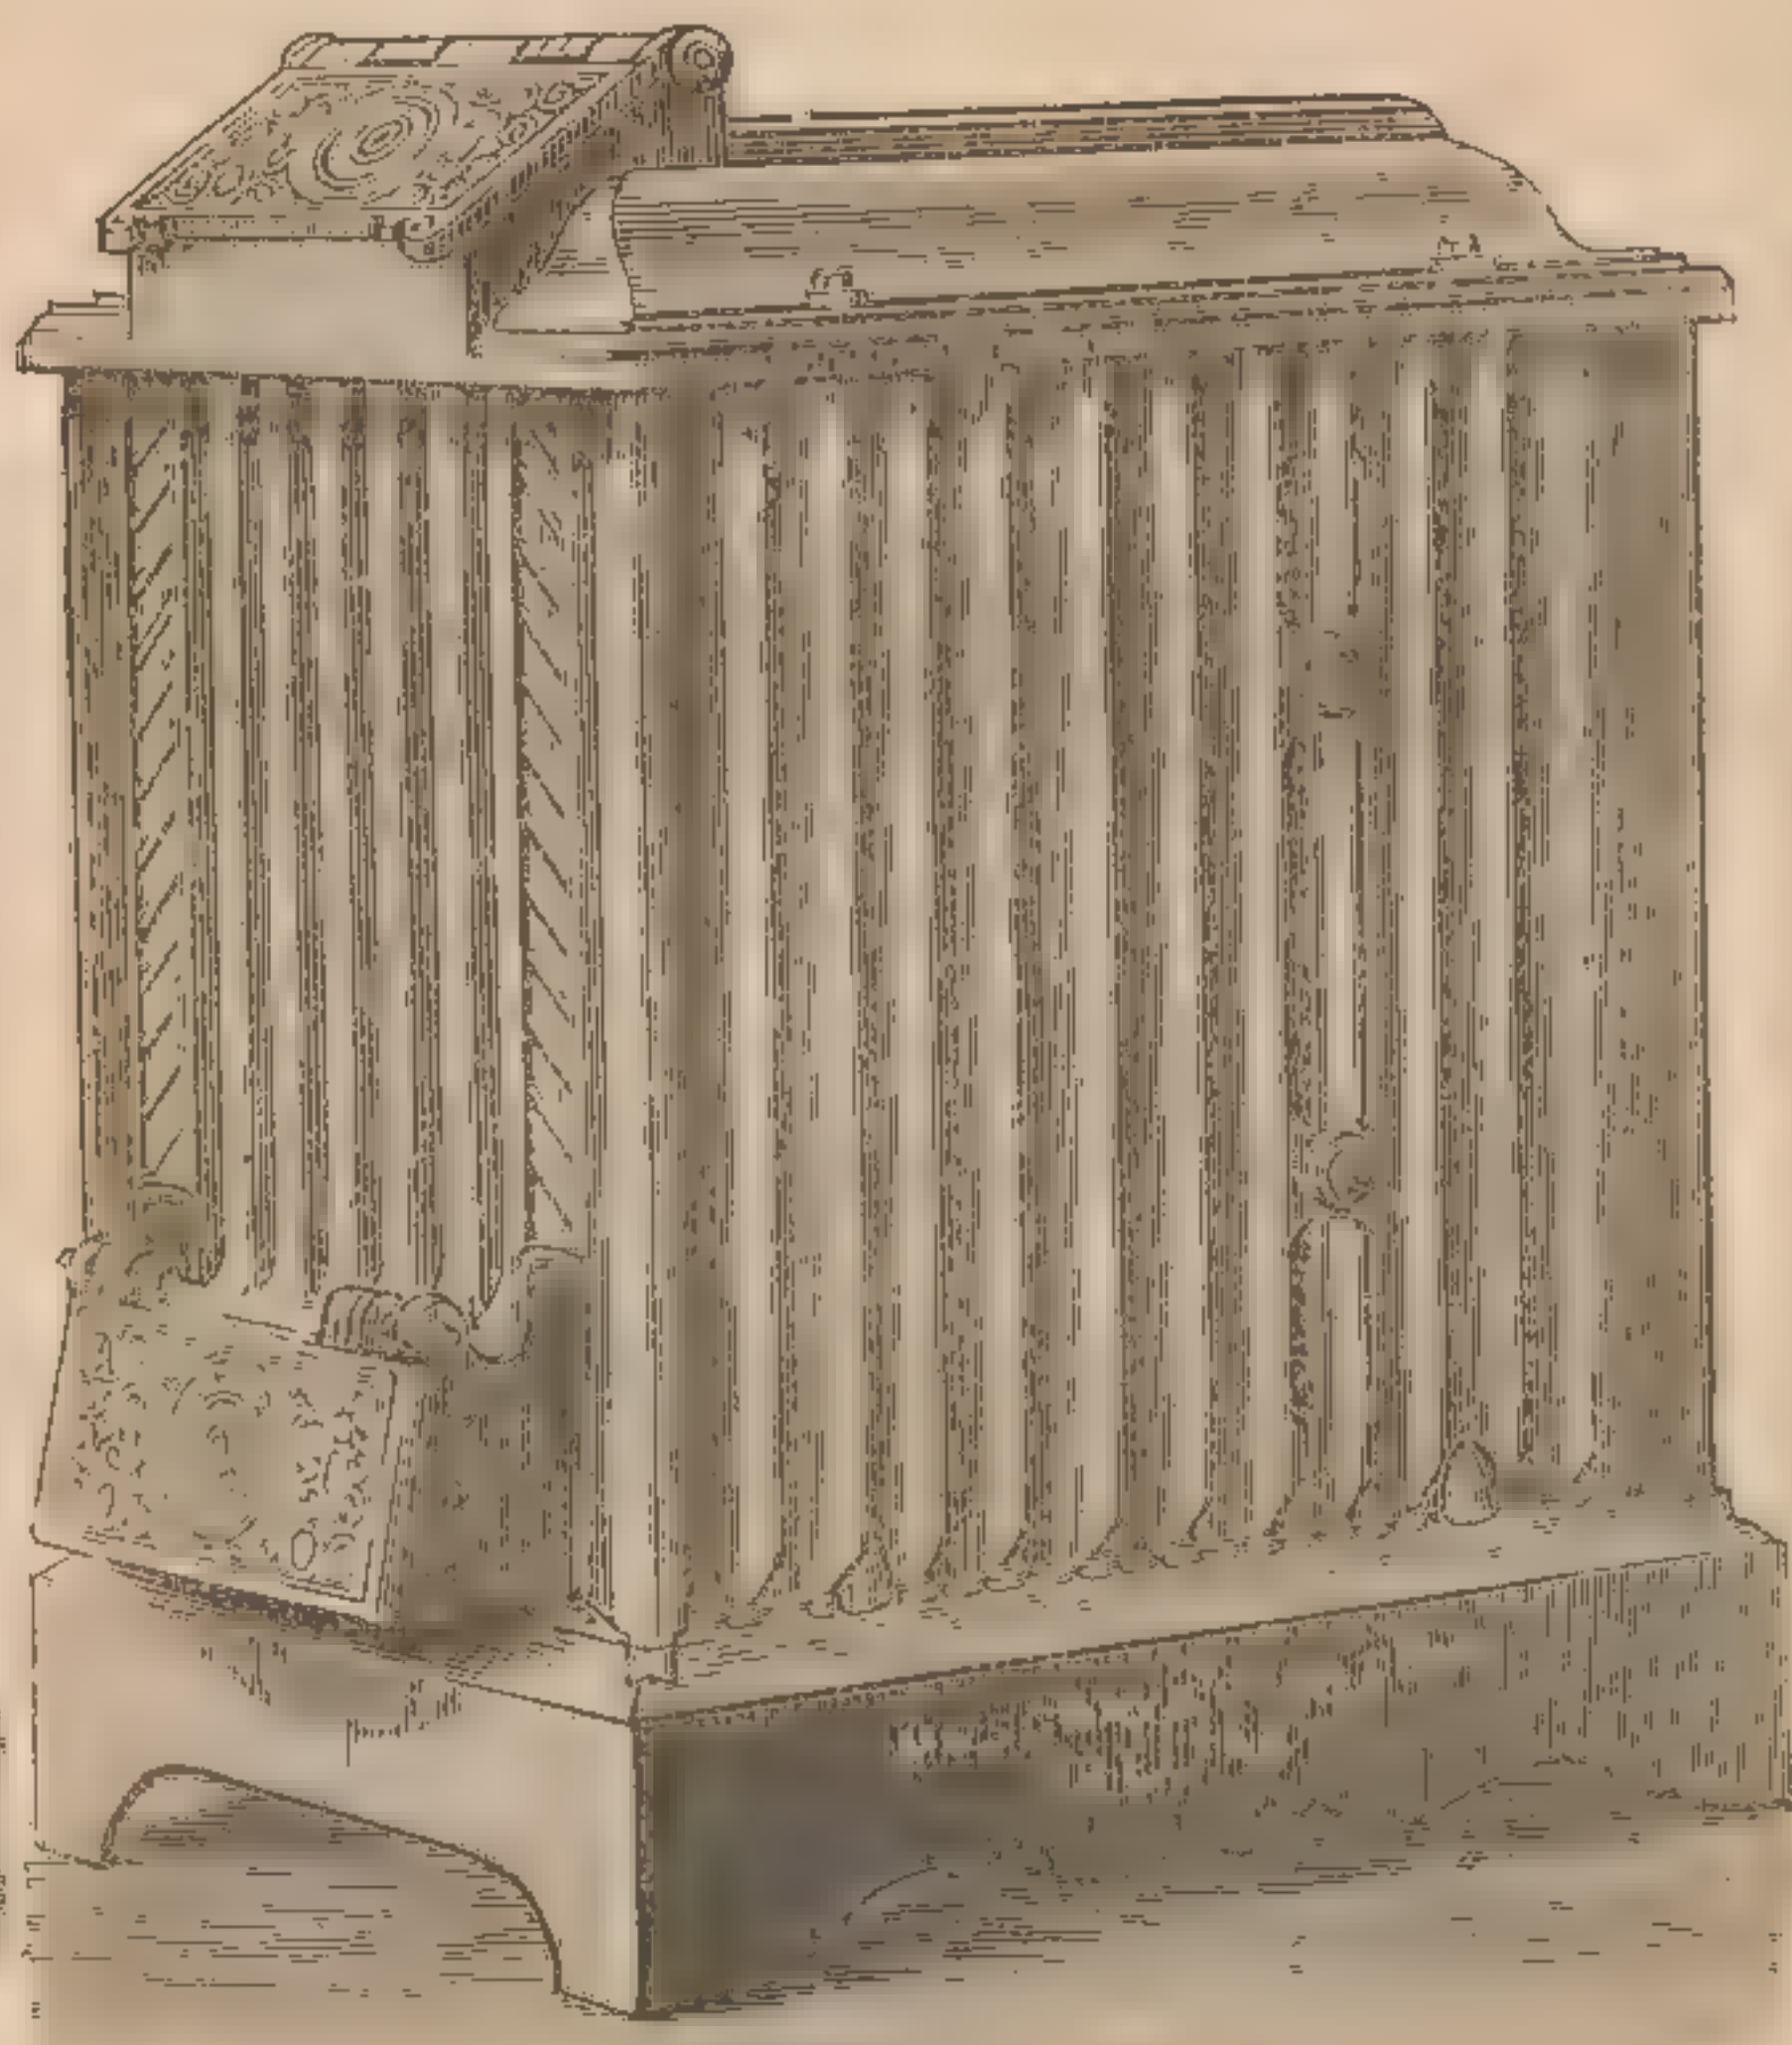

Gentlemen,—I have tried your Stove, as fitted in my house, and subjected to severe practical tests. I consider it to be an extremely economical and healthy heating apparatus; and I think it would be very advisable to construct it on a smaller size.

MUSGRAVE'S PATENT SLOW-COMBUSTION STOVES.

NEW ROUGH DESIGN 12 N.

Design 12 N, No. 1 Size.

Design 12 N, No. 3 Size.

In the construction of these Stoves many important improvements have been lately introduced which increase the heating power, durability, and general efficiency of the Stove, and secure the complete combustion of the gases, thereby extracting the greatest possible amount of heat from the fuel. These designs are largely used by School Boards, and are also suitable for Hospital Wards, Workshops, Drying Rooms, &c., &c.; but where more ornament is wanted, refer to Designs 19, 16N, 15, and 20. The Flue Nozzles can be at the back or top for ascending flues, or (in the larger sizes) at the base for descending flues, if desired. The former is to be preferred where practicable. If not stated in the order, Stoves will be sent with Flue Nozzle at back.

Selections from Letters (continued).

From Major-General Adams, Greenholme, Kingstown Hill,
Surrey, 14th October, 1879.

Gentlemen,—The "Intermediate" Stove has been put up in my hall by your foreman. It has been lighted only four hours, and the heat from it is diffused nicely over the whole house, raising the thermometer from 57° to 66°. As far as I am able to judge, I consider your Patent Slow-Combustion Stove, No. 15, excellently adapted for a moderate-sized house.

From Wm. Thompson, Esq., M.D., Lisburn.

I have had one of Messrs. Musgrave's Slow-Combustion Stoves in use for seven years, and have much pleasure in bearing testimony to its cleanliness, comfort, and economy. Its management is simple, easily understood by any servant, and it is not at all

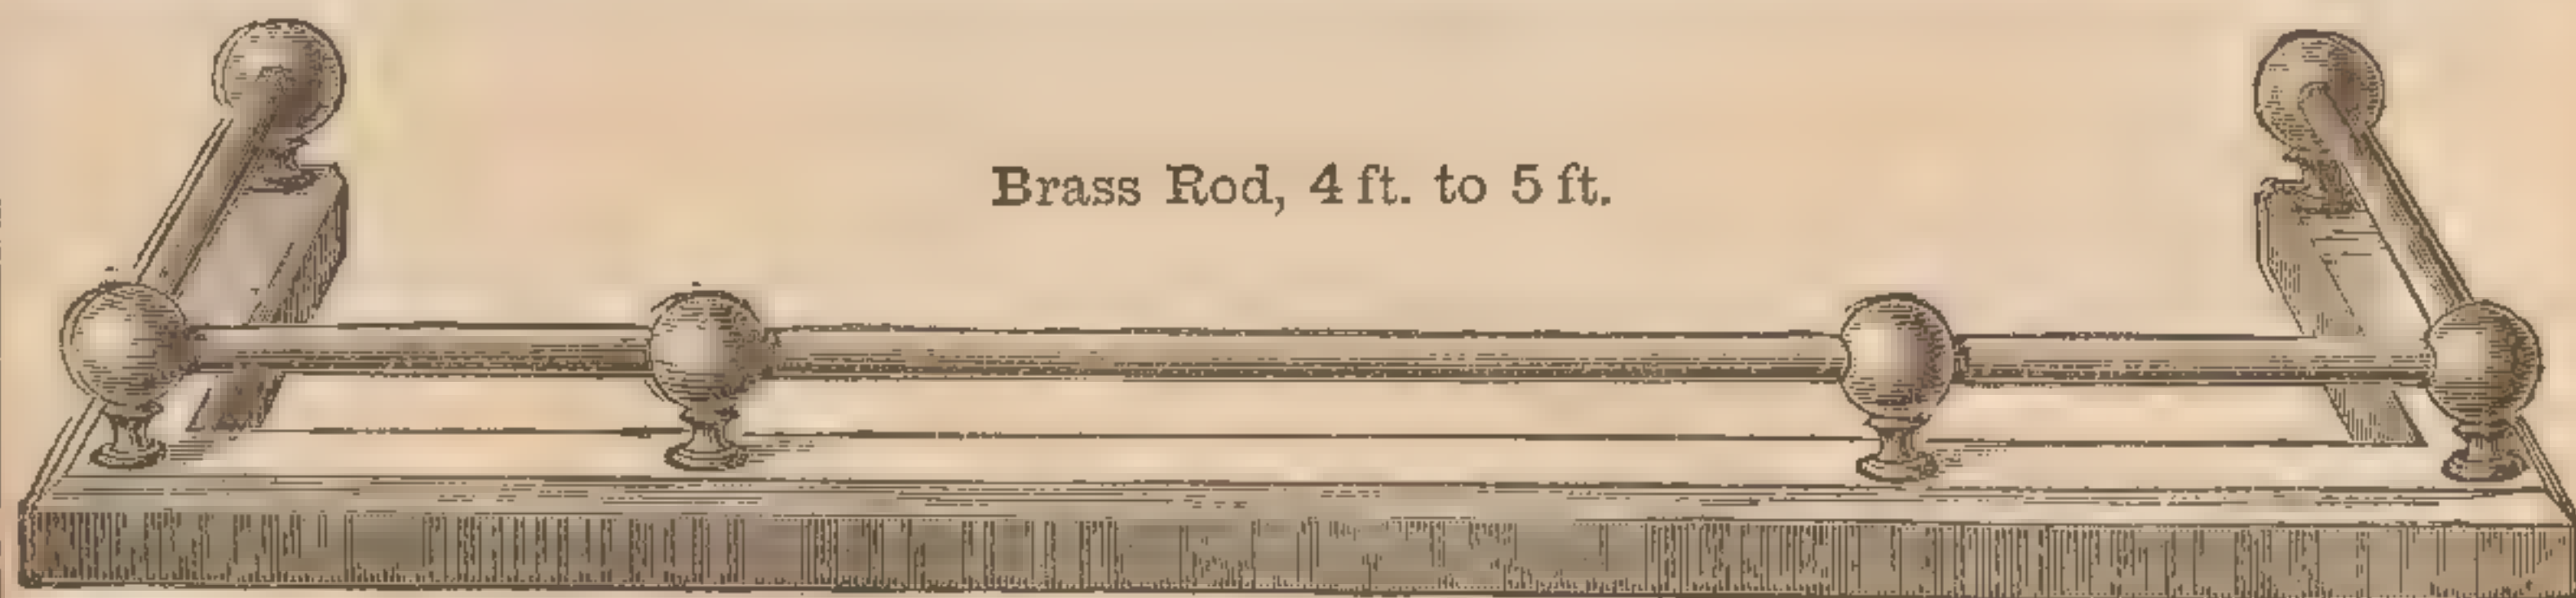

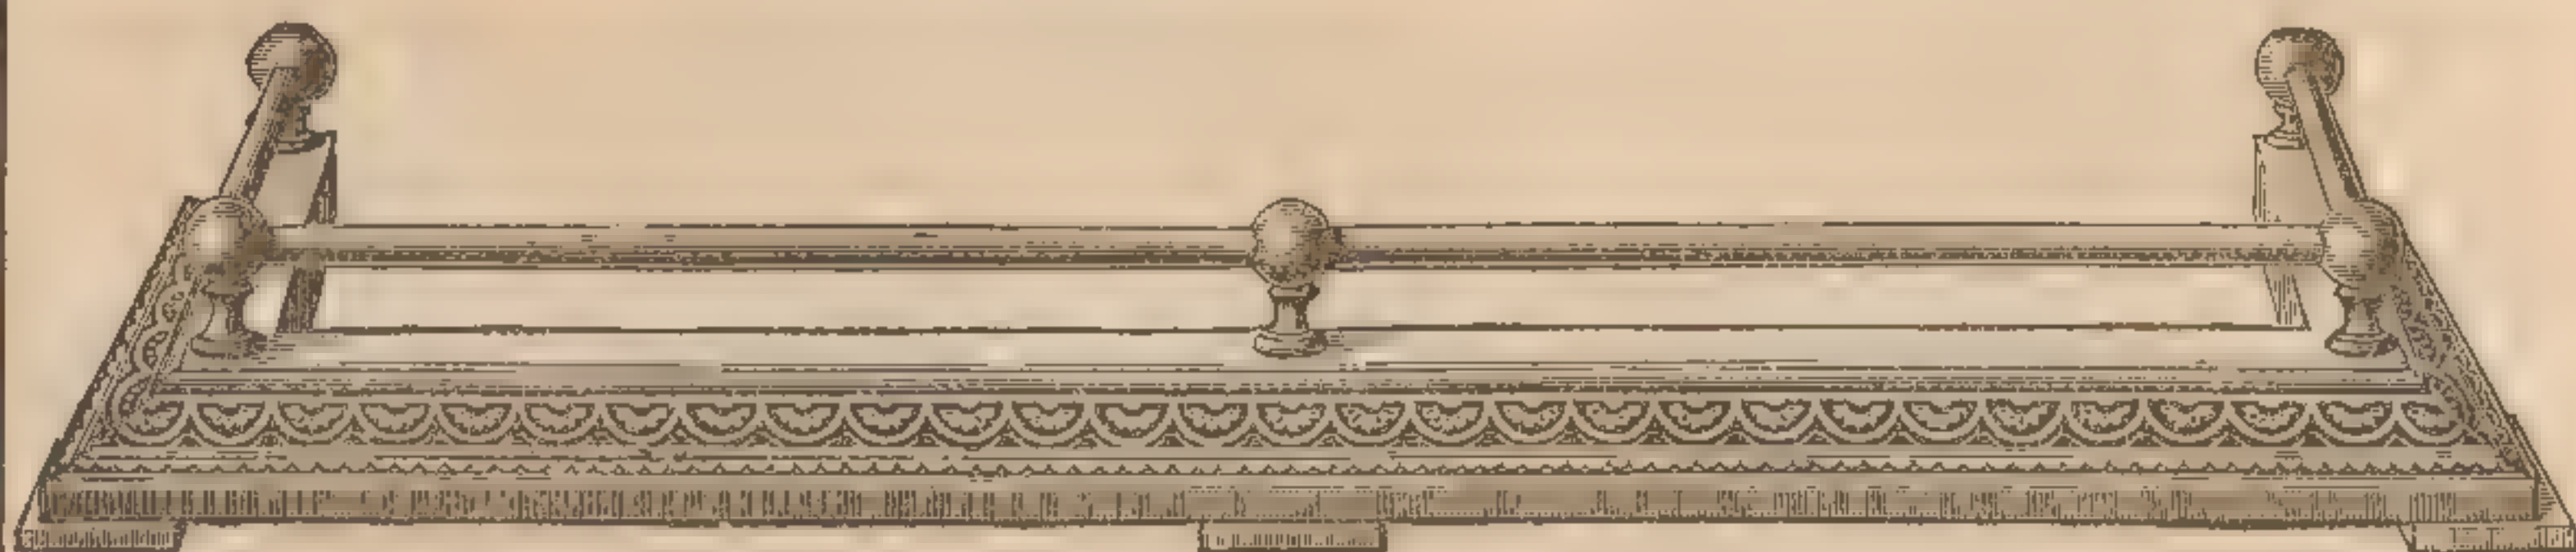

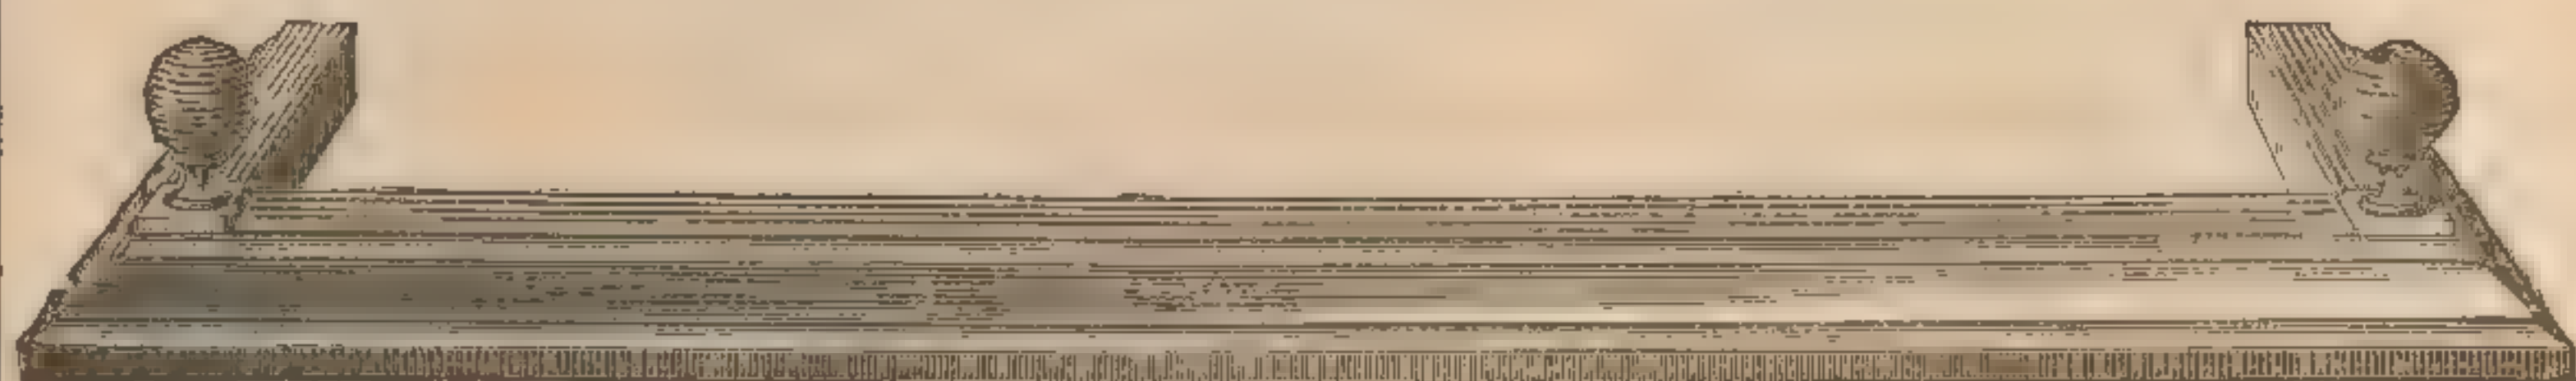

likely to go out of order—a proof of which is, that since mine was erected, it has never required the least repair. I may add that many of my friends who have, at my suggestion, introduced the Stove into their houses, have expressed their great satisfaction with it.

From Thomas J. Marsh, Superintendent Commonwealth of
Massachusetts State Almshouse, Tewksbury, Feb. 20, 1879.

Dear Sir,—The Patent Slow-Combustion Stove which I purchased of you last November has given entire satisfaction. I have used it in the ward assigned to infant children at this institution, and have been much pleased with it. I consider it one of the best—if not the very best—Stoves we have on the premises. It is simple in its construction. The matron in charge, and her helpers, have had no trouble in running it. It has done all you promised for it.

STRANGE'S A-1 CRYSTAL OIL.

TRADE

MARK.

LIGHT.

.....

The Proprietors of STRANGE'S A-1 CRYSTAL OIL take this opportunity of thanking their Agents and the Public for their liberal support during so many years, and to inform them that the same care will in future be bestowed in manufacturing and refining it.

STRANGE'S A-1 CRYSTAL OIL has now been extensively used by the Public for over 25 years, and there never has been an accident of any kind occasioned by it.

Although ordinary and unreliable brands of Petroleum are being offered cheaper, they are all more or less liable to accident.

The Proprietors of STRANGE'S A-1 CRYSTAL OIL would advise all consumers to see that each cask is branded with the Trade Mark, and that each vessel in which they receive STRANGE'S A-1 CRYSTAL OIL is FRESHLY labelled to ensure obtaining the genuine article, as large quantities of ordinary oils are being substituted by unprincipled persons for

STRANGE'S A-1 CRYSTAL OIL.

SOLE MANUFACTURERS OF

FISHBURN'S PATENT TUBULAR REFRIGERATOR

(PATENT No. 10,774).

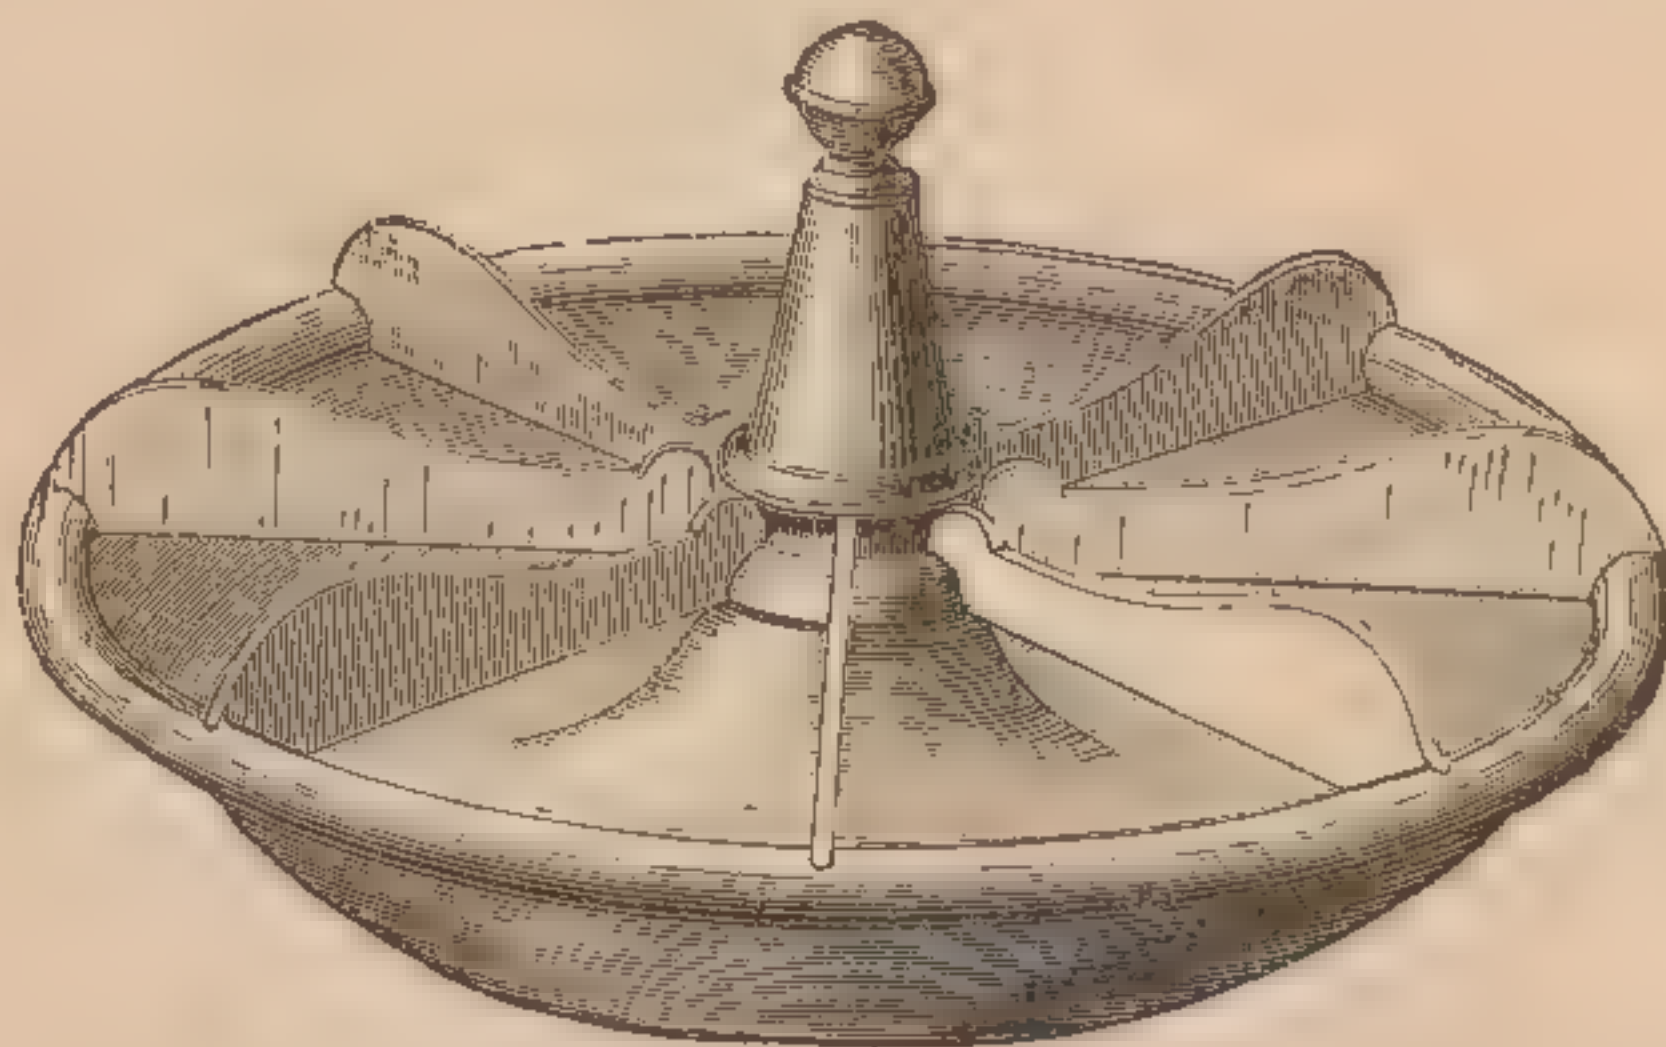

For Private Houses, Hotels, Restaurants, Butchers' Shops, Fishmongers,
Confectioners, Ships, Fishing Smacks, &c., &c.

The above Invention will be found of great service in preserving Meat, Game, Fish, Vegetables, Fruit, cooling Wines, Aërated Waters, &c. The Ice being placed in tubes quite separate from the contents of the Refrigerator, and a current of cold air introduced, secures a perfectly dry atmosphere, and prevents the flavour of one article communicating itself to another. It will be found that the contents will be preserved perfectly fresh for a much greater length of time than in any other Refrigerator in the market.

Estimates given for ERECTING and FITTING with the Apparatus
SAFES, COOLING ROOMS, &c., on board Ships, in Private Houses,
Shops or Factories.

THIS PRINCIPLE CAN BE FITTED TO ANY EXISTING REFRIGERATOR.

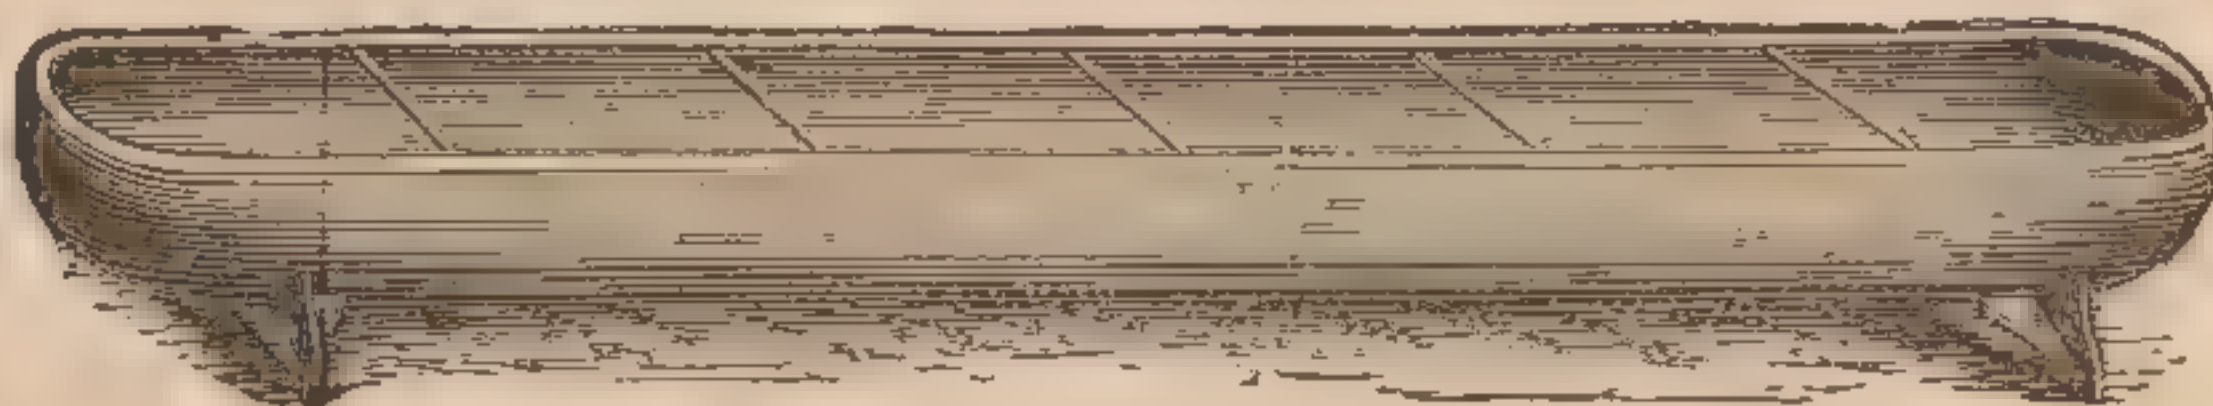

CIRCULAR PIG TROUGHS WITH REVOLVING TOPS.

GREEN'S PATENT "MULTUM IN PARVO" LAWN MOWER.

This Mower is specially designed to meet an almost universal want experienced by those who have small lawns or grass plots, to have a good and useful machine at a low price. The inventor having seen this want continually increasing year by year, has brought out this Mower to meet the requirements of the public by supplying a good and useful machine at a cheap rate. He commends it to all who want a small mower as the best one of this class extant.

GREEN'S PATENT GRASS EDGE CLIPPER.

SPECIALLY designed to meet a want that has long been felt in cutting the overhanging grass on the edges of walks, borders, flower beds, &c., and do away with the tedious operation of cutting with Shears. The material improvement we have made in it is fitting it with larger cutters and driving the revolving one with a chain same as the "Silens Messor" Mowers. This prevents any clicking or sticking fast of the cutter, which is speeded $3\frac{1}{2}$ times quicker than in the geared machines, so that the clipping is most effectually done by it at an easy walking pace. The result is a great saving of labour, as the edges are cut with much less tediousness than when done with shears. We recommend it to our customers with confidence, feeling assured that it will be found a most useful garden implement.

It is fitted with two handles, works steadily, and with ease.
